CSCI 232 Assignment – C Language Fundamentals

Points: 10

Instructions

1. **Fork** the repository on GitHub - `https://github.com/jpach-cs/232-ass02-template/tree/main` .
2. Clone your forked repository to your local machine.
3. Open the file `code.c`.
4. Work through each **challenge** from 01 to 14:
   - Read the comments for the given challenge.
   - Uncomment the indicated lines of code.
   - Follow the instructions — set a breakpoint, run the debugger, use Step Over / Step Into / Step Out, and observe the variables in the Variables / Watch / Call Stack panels.
   - Based on what you **observed in the debugger**, change `return 0` to the correct value.
5. Once all challenges are complete — save your changes, then **commit** and **push** to your repository.
6. Go to the **Actions** tab on GitHub and check the test results.
