CSCI 232 Assignment – Command Line Basics

Points: 1

Topic: File and Directory Operations in Windows Command Line

The purpose of this assignment is to familiarize yourself with basic command-line operations in Windows. You will use the Command Prompt (cmd.exe) to perform a series of tasks related to file and directory management. Follow the instructions carefully and document all commands you execute in the terminal.

Instructions

1. Open the Command Prompt in Windows (`cmd.exe`).
2. Navigate to the Desktop directory of the user account you are currently logged into.
3. Create a new directory named `folder`.
4. Navigate into the folder directory.
5. Use the `echo` command to create a new file named hello.txt containing the text `Hello world`.
6. Verify the contents of the directory by using the `dir` command.
7. Rename the file `hello.txt` to `hello2.txt`.
8. Delete the file `hello2.txt`.
9. Exit the folder directory.
10. Delete the folder directory.

Summary

After completing these steps, copy and paste all commands you entered into the terminal (along with any output) into a new text file named `result.txt`. Add the following acknowledgment statement at the end of your file:

```
// Your Name
// CSCI 232 Fall 2026
// Programming Assignment #1
// I declare that I am the author of this work, take full responsibility for it, and have d
```
